DETAILED ACTION

Response to Amendment

The rejection of claims 1-5 and 8-12 under 35 U.S.C. 103(a) as being unpatentable over Sinohara U.S. 2003/0128538, in view of Okabe, USPN 6,606,133 in the office action mailed 1/24/05 is withdrawn because Applicant amended claims 1-3 and 5-7 to more clearly disclose from which plane the 30 degrees is measured. This makes it clear which surface the Applicant is claiming the light emerges from and thus the invention is patentable distinguishable from the art of record.

Allowable Subject Matter

Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 1 has an illuminated device comprising illumination plate, plate has one face, one edge, one light source delivering light to plate via the edge, diffusion means comprising a cover having inner and outer surfaces whereby plate is a forward-diffusing acrylic material from the surface of which light emerges at angle of less than 30 degrees from the plane of said face at point of emergence and inner surface of cover overlies face to form an enclosure in which one face is disposed.

This combination of limitations is not found or taught in the art of record.

In particular, Sinohara, part of the art of record, has emerging light at an angle in an excess of 60 degrees from the plane of the surface of the plate and Applicant has emerging light at an angle limited to 30 degrees from the plane of the surface of the plate.

Claims 2-15 depend from claim 1 and are allowable for the same reasons.
